Marya Getu

Frontend & Full-Stack Developer

Computer Science & Engineering Student, Adama Science and Technology University

PROFILE

Fifth-year Computer Science and Engineering student with 3+ years of hands-on experience through volunteer work, coursework, and team projects, plus a professional internship. Builds responsive web applications in React, Next.js, Tailwind CSS, and TypeScript, and has delivered three team-based systems across an internship, a hackathon, and a company project. Also trained in graphic design, video editing, and data analytics, and works as an Amharic voice narrator. Motivated to build scalable, accessible software that improves collaboration and community services.

EXPERIENCE

Computer Science & Engineering Intern — Jul – Sep 2025

Ministry of Innovation and Technology, Addis Ababa

- Built and maintained responsive user interfaces for internal web applications using React.js, JavaScript (ES6+), and Tailwind CSS.
- Worked with senior developers to design and ship new features and improve existing application functionality.
- Contributed across the full development lifecycle of internal tools, maintaining high code quality and cross-browser compatibility.

Help Desk Management System Developer — Summer 2026

Company project, team of developers

- Collaborated in a team to design and develop a help desk management system for a client company, supporting ticket handling and support workflows.
- Contributed to the user interface and application features using Next.js and PostgreSQL, working with teammates through GitHub.

VOLUNTEER & CREATIVE EXPERIENCE

Volunteer — 3+ years

Community and campus volunteer activities

- Took part in volunteer activities for more than three years, building strong teamwork, organization, and communication skills.

Amharic Voice Narrator — Ongoing

Poems and book-style narration

- Narrate Amharic poems and book-style content with a clear, expressive voice.

PROJECTS

Gibi Gubae Management System — Hackathon 2026

React · Vite · Django REST Framework · PostgreSQL · JWT · Chapa API

- Built with a team: a full-stack platform to manage students, service groups, donations, and anonymous counseling for a campus community.
- Features include role-based access (Student/Admin), service group preference ranking and assignment, anonymous Q&A with admin moderation, and Chapa payment integration.
- Applied RESTful API design, secure authentication, and a separated frontend/backend architecture.

University Collaboration System — Internship project

React.js · Tailwind CSS

- Developed a web platform that streamlines communication and resource sharing between university departments.
- Built a clean, intuitive dashboard with responsive design that works across devices and screen sizes.

Personal Portfolio & Web Projects — github.com/EMAR2722

- Designed portfolio and showcase websites and a JavaScript calculator (CodeAlpha projects), showing strong HTML/CSS and UI skills.

EDUCATION

B.Sc. in Computer Science and Engineering — Expected 2027

Adama Science and Technology University, Adama, Ethiopia

Coursework: Web Development, Data Structures, Software Development
